I am a skilled **Frontend Developer** and **UI/UX Designer** with expertise in **HTML, CSS, JavaScript, React.js, Next.js**, and **Figma**. As a **computer engineering student at Yaba College of Technology**, I am passionate about creating seamless, user-focused digital experiences and delivering innovative tech solutions.

📁 PROFESSIONAL EXPERIENCE

present
lagos, Nigeria

Frontend Developer

I specialized in building responsive, user-focused web applications using modern frameworks like **React.js** and **Next.js**, along with core web technologies such as **HTML, CSS**, and **JavaScript**.

- > **Built Interactive Websites:** Developed dynamic, responsive websites that deliver seamless user experiences across devices.
- > **Optimized Performance:** Enhanced website speed and efficiency through clean code practices and performance optimization techniques.
- > **Collaborated on Projects:** Worked closely with designers and backend developers to translate UI/UX designs into functional web applications.
- > **Implemented Modern Frameworks:** Leveraged **React.js** and **Next.js** to create scalable and maintainable frontend architectures.
- > **Ensured Cross-Browser Compatibility:** Delivered consistent experiences across major browsers and devices.

lagos, Nigeria

Ui designer

- > **Designed User Interfaces:** Created responsive and visually appealing layouts, buttons, and design systems for web and mobile platforms.
- > **Developed Prototypes:** Built interactive wireframes and mockups using Figma for client presentations and usability testing.
- > **Maintained Consistency:** Established design systems and style guides to ensure cohesive branding across products.
- > **Improved User Experience:** Conducted usability testing, gathered feedback, and iterated designs to meet user needs.

present

Nigenius Technology Limited, Coding Tutor

As an **Online Coding Tutor**, I taught **SCRATCH PROGRAMMING HTML, CSS**, and. I guided the student through building real-world projects, troubleshooting code, and mastering core web development concepts. By tailoring lessons to individual needs, I helped learner gain confidence and improve their coding skills.

PROJECTS

Business-Dashboard [↗](#)

A **business dashboard** is a data visualization tool that provides a comprehensive overview of key performance indicators (KPIs), metrics, and important data for a business or organization. It typically displays real-time data in an easy-to-understand format, allowing decision-makers to monitor and track the performance of various aspects of their business.

Qr-code Generator [↗](#)

A **QR Code Generator** is a tool or software that creates **QR codes** (Quick Response codes). A QR code is a two-dimensional barcode that can store various types of data, such as website URLs, text, contact information,. It's designed to be scanned by mobile devices or QR scanners for quick access to the stored information
